DATA ENGINEERING WORKSHOP

1. Title of the Event : **Data Engineering**

2. Date and Venue

- **Date: 2026-03-06**
- **Venue: DS Lab-1**

3. Coordinator(s)

Event Coordinator: Dr K Rangaswamy

4. Resource Person(s):

Name: Dr. Akkem Yaganteeswarudu

- **Designation & Organization:** Senior Data scientist at Deloitte

5. Objectives of the Event

- ❑ **Introduction to Data Engineering Concepts**
- ❑ **Explains about Data pipelines**
- ❑ **ETL/ELT Concepts in Data Engineering**

6. Target Audience

- **II B.Tech - II Sem - 57**

7. Outcomes of the Event

Students able:

- ❑ All Data Engineering Concepts
- ❑ Data pipelines Concepts
- ❑ Detailed Explanation about Data Engineering

8. Event mapping with course Objectives

- All Data Engineering Concepts - **Low**
- Data Pipelines - **Medium**
- ETL/ELT Concepts - **Low**

9. Theory Outcomes

- Learn the fundamentals of natural language processing - **Yes**
- Understand the use of Context-Free Grammer(CFG) and Probabilistic CFG(PCFG) in NLP - **No**
- Understand the role of semantics - **Yes**

10. Conclusion

Creativity fuels innovation and helps people solve problems in unique ways. When individuals embrace curiosity and remain open to new ideas, they discover unexpected opportunities for growth. Challenges become stepping stones rather than obstacles. By nurturing imagination and resilience, anyone can transform simple thoughts into meaningful achievements that inspire others and shape a brighter future.
